

Tub Scrub

½ cup washing soda

1 cup baking soda

½ cup salt (coarse & not iodized)

5 drops lemon essential oil

Shaker jar

Sturdy scrub brush

Combine ingredients in bowl, mix well. Pour into shaker jar. Sprinkle mixture in tub basin and scrub away!

Tips:

I use an old gelato container as my shaker and used my power driver to drill some holes in the top. Any jar with a screw top lid that you can poke holes through will do!
