

Stain Remover

3 tablespoons baking soda

$\frac{1}{4}$ cup dish soap

$\frac{3}{4}$ cup hydrogen peroxide

16 oz. glass spray bottle

Add baking soda to spray bottle. In a separate container, mix dish soap and hydrogen peroxide. Pour liquid mix into spray bottle, close lid (make sure nozzle is OFF), and shake. Spray on stain, scrub in and launder as usual.

Tips:

For tough stains, let the spray sit for a while before scrubbing.
