

Olive Oil Moisturizer

½ cup olive oil

¼ cup coconut oil

¼ cup almond oil

¼ cup beeswax pellets

10-20 drops essential oil (for scent)

Wide-mouth mason jar or glass tub

Combine olive, coconut, almond oils and beeswax pellets into glass container. Place jar in a medium sized saucepan. Fill the saucepan with water to $\frac{3}{4}$ up the height of the jar. Bring water to boil over medium-high heat, stirring frequently, until beeswax turns to liquid. Remove jar from heat and add essential oils, stir. Place jar in bowl of cold water (to $\frac{3}{4}$ height of jar), place in fridge. Stir about every 5 minutes with a fork until texture is consistently thick and creamy.

Tips:

Don't use too much! Your body will absorb what it needs, and the rest will just sit on top of your skin as oil. Be sure to towel off any excess before dressing until you get a good feel for how much you need at every application

Use any combination of essential oils for scent.
