

Toilet Bowl Fizzers

1 cup baking soda

$\frac{1}{4}$ cup citric acid

$\frac{1}{2}$ teaspoon vinegar

1 tablespoon hydrogen peroxide

15 drops lemon essential oil

15 drops orange essential oil

Parchment paper & baking sheet

Mix baking soda and citric acid in bowl. Separately, mix vinegar and hydrogen peroxide. Pour liquid into dry mix, stirring until it clumps together. Add essential oils and mix well. Line baking sheet with parchment paper. Using an ice cream scoop or tablespoon, pack the mixture tightly into the scoop and tap out onto the baking sheet. Leave out to dry overnight. The next day, store tabs in an airtight container. To use, drop the tab into the bowl, let it fizz a bit and scrub using toilet brush.

Tips:

If you experiment with the ratios and your tabs deflate while drying, you can still use them as large flakes.
