

Glass/Mirror Spray

2 cups water

2 tablespoons vinegar

10 drops lemon essential oil

Glass spray bottle

Microfiber cloth (for glass) or newspaper

Combine water, vinegar and oil in bottle, spray on surface and wipe as needed.

Tips:

If you have been using chemical glass cleaner, the first 2 or 3 applications may be a bit streaky until the residue dissipates.

Make one large batch but keep smaller spray bottles around the house where they will be used most frequently.

Use with paper towels will leave lint.
